<b>HEAD OF DEPT.</b>	1
<b>TOTAL STAFF MEMBERS</b>	6
<b>CHIEF SPEAKER</b>	1
<b>TOTAL STUDENTS</b>	92

- **PURPOSE:** To acknowledge the various aspects of the clinical research and to enlighten the strength of pharmaceutical and IT sectors working together. This seminar helps the students in discovering new domains of relatively high and good PayScale with loads of opportunities in the coming future of pharmaceutical industries.
- **SIGNIFICANCE:** Clinical research plays a pivotal role in advancing medical knowledge and improving patient outcomes. By investigating the safety and efficacy of new interventions, clinical trials provide valuable insights that guide treatment decisions and enhance the quality of care. Important significance of clinical research includes, advancing medical knowledge, improving patient outcomes, understanding disease mechanisms, evaluating new interventions, enhancing evidence-based medicine, patient-centred research, ethical considerations, etc.
- **OUTCOMES:** Students were able to realise that the domain of clinical research is very vast and they can grab ample of opportunities to work under this domain. Not only this, the students were able to learn about the possibilities of pharmaceutical and IT sector joining hands in even more comprehensive way in the near future which will yield high packages job availability.
- **QUOTATION:** *“Research is formalized curiosity. It is poking and prying with a purpose”* – Zora Neale Hurston
- **AWARDS/CERTIFICATES:** None
